

Jill Buck is an international featured speaker at business, public policy, and environmental conferences, and has been featured in such publications as U.S. Mayor, National School Boards Association Quarterly, Working Mother Magazine, Women's Health Magazine, Ebony Magazine, and Diablo Magazine's "Women to Watch."

In 2002, Jill founded the Go Green Initiative, a 501(c)(3) that is the global leader in environmental education, operating in all 50 U.S. states and in 73 countries around the world. The program has been endorsed by the National School Boards Association (NSBA), National Recycling Coalition, 9 State PTA's, California Integrated Waste Management Board (now CalRecycle), California Resource Recovery Association (CRRRA), and many more. Jill serves on the editorial board of the Green Schools National Network's quarterly publication, Catalyst Magazine; and is a member of the Executive Committee for the K-12 Technical Council of CRRRA.

Jill is the host of Go Green Radio, a weekly program on the U.S.'s largest internet talk radio station, www.VoiceAmerica.com, and is co-author of the book, *47 Things You Can Do For The Environment*.

Jill Buck is an alumna of the University of Illinois, and after graduation, was commissioned a Naval Officer. While stationed at the Fleet Training Center, San Diego, she served as the Legal, Physical Security, Admin, and Command Inspection Officer, as well as a Damage Control Instructor. She is an honor graduate of the Military Justice School, and a graduate of the Navy's small arms weapons course, taught by former Navy Seals.

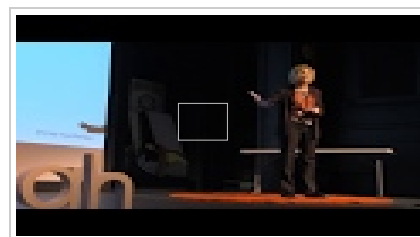

Jill holds a B.A. in English from the University of Illinois, and an M.S. in Education, specializing in Online Teaching and Learning, from California State East Bay.

- Supply Chain & Logistics
- Management
- Innovation
- Environment

Testimonials

"Jill was the most single knowledgeable interviewer I've ever encountered. I thought I'd just provide here the description she wrote to introduce her listeners to the show, as well as the remarkably astute questions she asked. This show runs far better than a Swiss watch. The engineer who made this all happen was amazing. "This show is about getting at the truth. It's not about posturing or advocating for a cause merely out of ignorance of the opposing point's perspective. It's about asking big, bold, irreverent questions, in this case: What precisely will happen if we move to renewable energy? Who will benefit? Who will lose? Jill wants to explore the good and the bad, the holy and the heretical. In a phrase, she asks her guests to "bring it on." To steal (and then bastardize) a phrase from one of my favorite movies, "A Few Good Men" I leave you with this: "She can HANDLE the truth."

"Jill Buck's thought-provoking keynote address was a highlight at the 2013 Power and Energy Conference at Illinois. An enthusiastic and engaging speaker, Jill kept us thinking and talking about energy policy long after her talk ended."
