

Don Strickland is a former Senior Executive at Apple, CEO of PictureWorks and CEO of IPIX. Currently Don is the President and CEO of Strickland Associates and serves as Adjunct Professor of Innovation and Entrepreneurship at Imperial College London.

Don Strickland has successfully built businesses internationally for both large public companies and private start ups. As a CEO he has consistently combined new technologies and business models to reinvent companies and grow stockholder value.

Expect to come away with a unique perspective on innovation, leadership and entrepreneurship.

Don Strickland was the visionary behind the world's first consumer digital camera, which he developed as Kodak's VP of Digital Imaging and launched into the market after joining Apple. As Apple's VP of Imaging and Publishing he led the re-architecture of Apple's computer platform for the publishing market from traditional print media to "new media" including the Internet, music and video. He left Apple to become CEO of Silicon Valley startup, PictureWorks Technology, and was a pioneer of the Web 2.0 business model. He took the company public through a merger with IPIX, and built the market value to US\$1.6 billion. He currently advises technology companies on business model innovation, leadership and entrepreneurship and serves as Advising Director of Innovation and Entrepreneurship, Imperial College London.
