

Ian Goldin is a leading global thinker and exceptional speaker. He is uniquely placed to bring together the frontiers of knowledge with the practical needs and strategic concerns of businesses, governments and individuals. After a career which included being CEO of a bank and vice president of the World Bank, he is now a professor at Oxford University and serves on a variety of boards as a non-executive director and is an advisor to a number of leading global firms. He is a high acclaimed author with his two most recent books *The Butterfly Defect: Why Globalization Creates Systemic Risk and What to Do* and *Is the Planet Full?* having been published in the Summer of 2014.

Goldin is the director of the Oxford University's Oxford Martin School which brings together over 300 leading researchers to provide solutions to some of the greatest challenges of our time. The School covers the frontiers of physical, environmental and medical science change and as well as economics and finance, population, migration, ageing, food and natural resources and the associated global governance and risk management challenges. The School is a leading center on the study of complexity, cyber security, financial and other systemic risks. Goldin is the University Professor of Globalization and Professorial Fellow at the University's prestigious Balliol College.

Goldin previously was at the World Bank, where he served as vice president with wide-ranging responsibilities. These included being a member of the Bank's Executive Committee and having responsibility for all major shareholder relations and relations with the UN and other global partners. From 1995 to 2001, Goldin was chief executive and managing director of the Development Bank of Southern Africa. Under...
