

Alexa Clay is a leading expert on subculture and innovation from unlikely places. She is the co-author of *The Misfit Economy*, a book that explores underground and informal innovation. Alexa Clay is the founder of Wisdom Hackers, an incubator for philosophical inquiry and the co-founder of the League of Intrapreneurs, a movement to create change from within incumbent systems and big organizations. Clay has written and appeared in *Fast Company*, *Forbes*, *Wired*, *Dazed and Confused*, *Vice*, *Harvard Business Review*, *The New York Times* and MTV. She is a regular commentator on topics related to economic transition, misfit subculture, social entrepreneurship and intrapreneurship and technology. To book Alexa Clay call Executive Speakers Bureau at 901-754-9404.

Testimonials

"Alexa shows us how actors in the informal economy are innovators whose importance equals that of Richard Branson or Steve Jobs."

- - VICE Magazine.

"Alexa Clay blew my mind, not only because of her vision of misfits as innovators, a bridging species between the old and the new economy, that fight against institutional inertia, but for her capacity of having apparently endless cool side projects. Going beyond of the moral issues that divide the world into good and evil, in *The Misfit Economy* she documented the practices that were used by hackers, copycats or pirates to innovate."

- - Excerpt from *Power to the Pixel* review.
