

**Siddhartha Mukherjee** is a pioneering physician, oncologist, and author who has redefined our public discourse on human health, medicine and science. A profoundly influential voice in the scientific community, he is best known for his books, *The Emperor of All Maladies: A Biography of Cancer*, which earned him the 2011 Pulitzer Prize, and *The Gene: An Intimate History* which won international awards and was recognized by *The Washington Post* and *The New York Times* as one of the most influential books of 2016. He is also the author of a TED Original book, *The Laws of Medicine: Field Notes from an Uncertain Science*. His published works exhibit an outstanding literary skill that has left an indelible mark on our culture, as *The Emperor of All Maladies* has been adapted into a documentary by filmmaker Ken Burns, and was included among *Time* magazine's 100 best nonfiction books of the past century.

His most recent book, *The Song of the Cell*, is the third book in this extraordinary writer's exploration of what it means to be human, chronicling the discovery of cells and how they're used in modern medicine. Met with extraordinary praise, the book maintained a spot on the *New York Times* bestseller list for several weeks and was named to many "Best of 2022" book lists.

Dr. Mukherjee's achievements as a writer and educator build upon his career as a renowned medical scholar. His groundbreaking studies into the composition and behavior of cancer cells have pushed the boundaries of modern medicine. His innovative research signals a paradigm shift in cancer pathology, and has enabled the development of treatments that reach beyond current pharmaceutical models toward new bi...
