

Dr. Timothy G Ihrig is the Chief Medical Officer of Crossroads Hospice & Palliative Care. He also acts as a private consultant through his role as Chief Executive Officer of Ihrig MD & Associates.

Dr. Ihrig is internationally recognized for combining clinical and administrative experience to system design around population health management, care coordination and care delivery for the most vulnerable population. He is an expert in understanding risk as applied to healthcare contractual entities, micro- and macro- healthcare economics, population health, regulatory compliance from a system perspective and the interaction of all three. He combines a visionary approach to care delivery through a unique philosophical perspective modeled into methodology which can be strategically implemented into any healthcare system to meet the needs of patients, systems, and payers. This has led to unparalleled success in across-the-continuum population health and community-based palliative care and hospice program development and innovation.

Successes:

Created, de novo, one of the most successful population healthcare models in the country and executed clinically and operationally in this healthcare space across all settings

Successfully reproduced care model with similar results across variable settings and systems

Near 94% zero hospital admissions for live outpatient palliative care patients

40% reduction in 30-day readmissions

70% per-capita reduction in expenditures estimated on pre- and post- palliative care involvement over comparative 12 month periods

Decrease in acute hospitalization days from above 4 to 1.79 with Palliative Care
