## Testimonials

"We were captivated by Katie's energy, her personal and accessible style and the compassionate humor—we're still talking about it. In a word, a huge hit! I know I left enlightened and invigorated, and that's a terrific gift. And, I think those who can transmit that power—the power of creative ideas—those folks have a responsibility to do so. It's the sort of thing that keeps a community's soul alive. And, Katie can bring that."

"Katie's hands-on presentation style included improvisation skills for thinking outside the box, listening to your intuition, gagging that inner critic and letting go. I would highly recommend Katie Goodman's workshops to conferences, organizations' retreats or any individuals who are looking for laughter and a means to connect with other women. These skills are truly applicable to anyone."
