

Watery images of the once-glorious *Titanic* were some of the most enchanting and enthralling images of recent years, something most people only dream of seeing in real life. For Robert Ballard they represented a concrete accomplishment, and just one in a series of triumphs.

World-famous for his discovery of the *Titanic* and the *Bismark*, Ballard leads audiences on a journey to plumb some of history's greatest mysteries. Ballard's adventurous spirit is matched by a practical and hugely successful approach to goal setting, team building and execution. The skills that led to his headline-grabbing accomplishments are the same skills that now lead people from all walks of life toward a realization of their dreams.

A renowned scientist and explorer, he is the author of 16 books, including *Discovery of the Titanic*, and *Collision with History: The Search for John F. Kennedy's PT 109*. After many years of exploring ancient history in the Mediterranean and Black Seas with the discovery of the largest concentration of ancient Roman ships ever found under the sea, most recently Ballard has turned his sights on the Pacific ocean and his team and ship of exploration, E/V Nautilus are working off the west coast of the US.
