

SAM SILVERSTEIN

AV REQUIREMENTS

MICROPHONE

A wireless lavalier microphone OR wireless headset is requested.

COMPUTER

Sam will provide his PowerPoint presentation to your AV team via a USB drive. Please provide a wireless clicker to advance slides. Sam typically requires a 5-10 minute AV check prior to the event.

PRESENTATION

Due to the highly customized nature of the keynote presentation, we cannot share a final slide deck in advance.

Sam uses the front center of the stage extensively. Sam also moves across the entire front of the stage to best engage the audience. If you have a podium on the stage, please place it off-center and 3-4 feet back from the front edge. Feel free to discuss staging with us if you need additional information.

A confidence monitor is preferred, although not required.
