

LISA WALDEN

AV REQUIREMENTS

MICROPHONE

A lavalier microphone (with backup batteries) is required because Lisa walks around a lot during her presentation. Many parts of the presentation are interactive, so please have some roving mics available.

CONFIDENCE MONITOR

Preferred Option* Lisa's ideal setup calls for a confidence monitor. **It is critically important that the monitor allows her to see both her current *and* next slide.**

Option 2* If the preferred option above is not possible, Lisa asks for a podium on stage where she can run the presentation directly off of her laptop, with the **current and following slide displayed on her computer monitor.**

COMPUTER

Lisa uses a 2020 12-in MacBook Pro computer that requires a USB-C—HDMI adapter. She'll bring her adapter but asks that you have one as well for back up. Lisa will always bring her own clicker but will use yours if the occasion calls for it.

PRESENTATION

Aspect ratio: 16x9 Lisa uses Keynote **Due to the highly customized nature of the keynote presentation, we cannot share a final slide deck until day of.**

SOUND

Sound is embedded into most presentations and will need to be played over the house sound system. Sound hook up is via her computer's headphone jack.
